Dear Michael Flowers,

Fine Grain Steel Testing

With respect to steel materials recently produced for ZPMC in Shanghai, it has come to the Department's attention that mill test reports (MTRs) did not include grain size testing results and certification for fine grain steel as required in Section 55-1.03, "Inspection," of the Standard Specifications.

It is understood the required grain size testing is forthcoming as amendments to the MTR's. Please be advised that final acceptance of said steel materials is pending the outcome of grain size testing.

It is also understood that for future steel orders, the grain size testing and certification will be included in the MTR.

Sincerely,
